

Disaster Kits in a Bucket

The Disaster/Emergency Kits in a Bucket holds a variety of emergency and medical items in a 5 gallon bucket. The wonderful feature of this kit is that everything is in one place and can be picked up quickly in the event of an earthquake or other natural disaster. Since this is only a beginning disaster kit, it does not provide food or water. Public Health information and American Red Cross brochures can also be placed in the kit for handy reference. Most of the items can be found in a grocery store or in the sporting goods section of a discount store. Paint stores have 5 gallon buckets.
